Art Unit: 1621

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, 6-8, 11-13 and 16, drawn to compounds wherein Z is nitrogen and R1 and R2 are as in case iv (please see claims), classified in class 544, subclass 234+.
- II. Claims 6-8, 11-13 and 16, drawn to compounds wherein Z is nitrogen and R1 and R2 are as in cases i, ii, or iii, classified in class 544, subclass 238+.
- III. Claims 6-8, 11-13 and 16, drawn to compounds wherein Z is nitrogen and R1 and R2 are as in case v, classified in class 546, subclass 235+.
- IV. Claims 1-3, 6-8, 11-13 and 16, drawn to compounds wherein Z is carbon and R1 and R2 are as in case iv (please see claims), classified in class 546, subclass 122+.
- V. Claims 6-8, 11-13 and 16, drawn to compounds wherein Z is carbon and R1 and R2 are as in cases i, ii, or iii, classified in class 546, subclass 152+.
- VI. Claims 6-8, 11-13 and 16, drawn to compounds wherein Z is carbon and R1 and R2 are as in case v, classified in class 546, subclass 112+.
- VII. Claims 4, 5, 9, 10, 14 and 15, drawn to methods of treating tumors, classified in class 514, subclass 247+.
- VIII. Claims 4, 5, 9, 10, 14 and 15, drawn to methods of treating retinopathy or macular degeneration, classified in class 514, subclass 247+.

Art Unit: 1621

- IX. Claims 4, 5, 9, 10, 14 and 15, drawn to methods of treating arthritis, classified in class 514, subclass 247+.
- X. Claims 4, 5, 9, 10, 14 and 15, drawn to methods of bullous disorders, classified in class 514, subclass 247+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-VI and VII-X are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case applicants claim multiple methods of using and additionally materially different products could be used for treating the disease of groups VII – X such as, respectively, fluoro-uracil compounds, laser therapy, aspirin, and antibiotics. Groups I-VI are distinct because the compounds are so structurally disparate a reference anticipating one would not necessarily render the other obvious. Additionally, groups VII-X are disctint inasmuch as a method of treating one disease would not necessary render as obvious the treatment of the other diseases.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1621

Applicants are further required to elect a single disclosed species, i.e a

single disclosed compound if one of groups I-VI are elected or a single disclosed

method wherein a single compound and disease state to be treated if one of

groups VII-X is elected.

A telephone call was made to Mr. Grey on 17 November 2006 to request an oral election to the above restriction requirement, but did not result in an election being made as Mr. Grey asked for a written restriction.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Art Unit: 1621

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication should be directed to Peter G. O'Sullivan at telephone number (571)272-0642.
